2026

A newly built residential project in Lakatamia, Nicosia, situated in a contemporary and well-organized neighborhood with easy access to main roads, public and private services, and universities.

The building stands out for its high construction standards, carefully planned architectural design, and strong attention to detail, offering residents a comfortable and functional living environment.

Constructed with modern materials, the property meets Energy Efficiency Class A specifications, ensuring reduced energy consumption and lower running costs. It features premium finishing materials, thermally insulated aluminium windows with double glazing, and a solar water heating system.
